Governance 360°

Software that creates structure for you and your Board

Struggling with poor workflow, lack of focus and wasting time on simple Board admin?

Built by an award-winning team of entrepreneurs who know your world of pain, let Governance360 make running board meetings, risk registers and compliance simple. And all at incredible value for money.

Who we help

You lead or administer a small to medium sized organisation. You didn't train in Governance (probably) - it is something you have picked up as part of your role and it makes you anxious. Not least with the lack of time each month to 'manage it'.

You are doing the best you can, yet you crave simple workflow to save you time, make you more efficient and reduce your risk.

If this is you - then Governance360 is for here to help!

What we help you solve

Bring structure to your Board processes

Your Board probably has no clear structure - email and cloud storage aren't efficient board management solutions. Cheap yes, but what about workflow and lack of common process?

Drive Risk management & Compliance

Risk Registers that never see the light of day, aren't updated and need someone to email to you? And key compliance routines in similar disarray?

Develop Board skills and knowledge

Want to provide Board education (to inductees or to facilitate better meetings) but can't afford existing, often in-person options?

Our Platform

Board Portal

- Simple Board paper workflow
- Key document and policy storage
- Calendar integrations
- GDPR/Cyber secure

Risk Register

- Board Risk Register tool
- 24x7 access to Board members
- RAG rated visualisation tool
- Export and share easily
